NOW THE SUBURBAN.

Interest in the Great Race To-Morrow at Fever Heat.

A Royal Struggle Between the Pick of the Thoroughbreds.

The Probable Starters and Their Chances as Shown by Their Records.

The great Suburban Handicap, at a mile and a quarter, to be run at the Coney Island Jockey Club's track at Sheepshead Bay to-morrow, will undoubtedly bring together a finer lot of thoroughbreds than have ever be fore competed in this time-honored event.

The grand stand at Sheepshead has been re milt and enlarged so that it is nearly double its former size. In addition seats have been arranged on the roof, and in this innovation the Coney Island Jockey Club takes the lead. In England roof seats are a feature at nearly every race course. In this country Sheepshead Bay alone possesses them.

Only one horse can win and the great question with the sporting men to-day is. Which will win the Suburban? Will the swaybacked Tenny repeat his victory in the Brook byn Handicap or will some outsider surprise every one, as did Castaway II. last year !

Tournament is a four-year-old coit, by imp. Sir Modred, dam Plaything. His record last year was a brilliant one, but so far this Spring he has done nothing worth speaking of. In fact, his races have been poor, but Tournament hever was an early horse. He should have a good chance in the handleap, especially if the track is heavy.

Prince Royal is a six-year-old, by Kingnisher, dam imp. Princess. Though he ran second in the handleap his subsequent performances have been very poor, so poor, in fact, that his owner is doubtful as to whether he will start him.

Of the others but little can be said. Their chances are hardly worth reviewing.

The race will probably be fourth on the card, and this will give many business men a chance to see it, as the horses will probably be started about 4 o'clock.

The two most direct routes are by way of Ray Ridge ferry from the foot of Whitehall street, and from Long Island City by way o Thirty-fourth street ferry.

It may be a cool Summer for that section of the Department of Agriculture stationed in the loft of the Equitable Building, but there were a host of men and women on the heated pavements of the eity to-day who acted just as though they were inclined to doubt the weather sharp.

"Oh, thus far my prediction of a cool Summer, based on the ascertained fact that seasons balance seasons, has been admirably verified," said the ex-Sergeant this morning, laying down his fan and mopping his brow argumentatively.

Down in Broadway throngs of people moved to slow music and perspired as they walked between the high facades of the business buildings.

The defense requested the production of a second paper, executed on the same day, in the insture of a contract which showed i hat the than tarter of a contract which showed i hat the transfer of the stone to Carroll was for the purpose of enabling him to sell and transfer title transfer of the stone to Carroll, who paid was to pay \$3,000 more after importing the stone into New York from Montreal, to relian was agreed that Carroll was to get \$30,000 during the first two months of the period of six months, for which time it.

In the middle of the day, when there was no shady side to Broadway and the other longitudinal thoroughfaires, there was a sort of alagnation in travel.

The principal street-car lines improvised sub-stations, where relays of horses were held, at frequent latervals along their routes, and every car carried as many people as could get a foothold on it.
